Full Stack Software Engineer — Backend and Platform Systems

PROFESSIONAL SUMMARY

Full stack software engineer with strong backend focus, building scalable web applications and multi tenant systems. Experienced in React, Django, PostgreSQL, Docker, and AWS, with work across frontend, backend, database, deployment, and production debugging.

WORK EXPERIENCE

- Edubricz Technologies** Onsite
Full Stack Developer Intern Aug 2025 – Present
 - HOST Platform:** Built dashboard features for site lifecycle actions and monitoring using React and Django REST APIs with component based UI and state management.
 - Designed REST APIs and database workflows to support multi tenant systems, authentication, RBAC, and resource allocation.
 - Managed deployment and testing workflows on AWS EC2, troubleshooting runtime issues and ensuring stable pre production releases.
 - Architected HOST, a production grade platform for deploying isolated WordPress and full stack applications using Docker based systems.
 - Reduced deployment time by **58 percent** and teardown time by **50 percent** through improved container lifecycle handling.
 - Built encrypted AWS S3 backup pipelines with retention scheduling and AWS RDS failover support.
- Sales Tracking System** Live
Developed a full stack sales management platform using React, PHP, MySQL, and AWS for education sector field teams.
 - Built Google Maps integration, authentication workflows, and backend APIs for route planning, visit tracking, reporting, and coverage analysis.
 - Deployed the system on AWS EC2 with AWS RDS integration, supporting 8 salespersons and 3 admins covering 50 plus schools and colleges.
- Freelance Web Developer** Remote
Frontend Developer 2024
 - Delivered 6 production ready React applications from requirement gathering to deployment.
 - Built responsive UI systems integrated with backend APIs across devices.

PROJECTS

- RecruiterRisk AI Recruiter Trust Platform** Live
Built a full stack web application using MongoDB, Express, React, and Node to detect fraudulent job postings. Implemented authentication using JWT and role based access control, along with recruiter dashboards for trust scoring. Designed REST APIs and backend workflows to validate recruiter data and generate risk insights.
- Soft Tissue Tumor Diagnosis GM UNet** Publication
Developed MRI tumor segmentation pipelines including preprocessing, model training, and evaluation. Implemented Dice and IoU metrics achieving 87 percent validation accuracy using TensorFlow models.

TECHNICAL SKILLS

Primary Stack: React, TypeScript, Django, Django REST Framework, PostgreSQL
MERN Stack: MongoDB, Express, React, Node
Frontend: Responsive Design, Component Architecture, State Management
Backend: REST API Development, Authentication, RBAC, OAuth
Databases: PostgreSQL, MongoDB, MySQL
Cloud and DevOps: AWS EC2, AWS S3, AWS RDS, Docker, CI CD, Linux, Git
Other Tools: Supabase, Firebase
Languages: Python, Java, JavaScript, PHP, C, SQL

EDUCATION

- PES Institute of Technology and Management** Shivamogga, Karnataka
B.E. in Computer Science and Engineering 2022 – 2026
